## CTN-0032 CRF Level Data De-Identification Notes

---

The Case Report Form (CRF)-level de-identified data sets were prepared by reviewing the CRFs and the data dictionary to identify a list of variables that contained, or could potentially contain, identifying information, such as dates and free text fields. The variables were programmatically removed or modified in the raw dataset, resulting in de-identified datasets. All dates were converted to “days on study,” where the date of randomization (BASEDATE) = 0. A negative value for days on study refers to an event that occurred prior to randomization (e.g., date of birth) and a positive value for days on study refers to an event that occurred after randomization (e.g., 12-month visit date). The following free text fields were emptied:

- Any responses derived from “Other. Please specify” or “Specify other reason”. For example, other races, marital status, therapy sessions, SAE categories, reasons study drug not given, abnormalities on ECG and Urine Analysis forms.
- Comment fields
- AE/SAE terms were retained in the database, but any detailed descriptions in a separate field providing additional information the AE or SAE were erased. This includes relevant labs, medical history and medications, drug/alcohol use description, probable cause of death.
- On dosing logs: lot numbers, who administered dose.
- All medical history information.
- Concomitant medication names, purposes, and start year were *retained* in the database, but start dates and months were dropped.
- All protocol violations
- Type of work; job description/parents' type of work; school program name and major; descriptions of living situation, illnesses, concerns, drug/alcohol use, feelings/interests.

Following is a list of all variables in the dataset that were modified or emptied in order to de-identify the data, based on the following commands:

PATIDDEID assigns to each patient a unique value in a variable called PATIDDEID.

BASEDATE names the variable that is used as the base date to calculate days on study. In this study, BASEDATE is date of randomization.

DOS names a variable that is to be converted from a date into days on study.

EMPTY defines a variable to fill with missing values.

DROPFIL defines a data set to drop.

The following documentation presents information on the variable based on the name within the database. To get the corresponding label of the variable, one must look within the data dictionary in Excel that is also provided on the CTN Data Share web site.

The following rules were applied to the CTN-0032 SDTM database to de-identify them:

1. All dates were converted to days of study.
2. All patientnumber were converted to a random id number called PATDEID
3. Specific file by file de-identification changes follow by domain.

**For all the datasets dates were changed to days of study and site was emptied.**

**AE:** Removed AEID(Staff id)

**AEMEDRA:** Removed subjno(patientnumber), entry\_id(staff id) and coder(person who coded)

**COMP:** Removed comp01 (staff id), compsp (PI decision) and compsig (Investigator's signature)

---

## CTN-0032 CRF Level Data De-Identification Notes

---

**EE:** Removed ee16a (unstable house condition), ee03a(specify field), ee03b(specify field), ee06a(specify field), ee06b(specify field), ee09a(specify field), ee09b(specify field), ee12a(specify field), ee12b(specify field), ee15a(specify field), ee15b(specify field) and ee20(general comments).

**EEU:** Removed eeu16a (unstable house condition), eeu03a(specify field), eeu03b(specify field), eeu06a(specify field), eeu06b(specify field), eeu09a(specify field), eeu09b(specify field), eeu12a(specify field), eeu12b(specify field), eeu15a(specify field), eeu15b(specify field) and eeu20(general comments).

**HIVG1:** Removed h101(staff id), h102sp(Specify judge CTP), h102rs(Specify other reason), h103sp(Specify other reason), h104sp(Specify other reason), h105sp(Specify judge CTP) and h105rs(Specify other reason)

**HIVG2:** Removed h201(staff id), h202sp(Specify other), h202rsp(Specify other), h203sp(Specify other), h204sp(Specify other), hg205sp(Specify other) and h205rsp(Specify other)

**HIVG3:** Removed h301(staff id), h302sp(Specify other), h302rsp(Specify other) and h303sp(Specify other)

**HIVRER:** Removed rer02(staff id), rer06sp(Specify other reason), rer06ps(Specify other plan) and rer07sp(Specify other)

**HIVRERF:** Removed rfr02(staff id), rfr06sp(Specify other reason), rfr06ps(Specify other plan) and rfr07sp(Specify other)

**HIVFR:** Removed hrf01(staff id), hrf02sp(specify other), hrf03sp(specify other), hrf04sp(specify other), hrf05sp(specify other), hrf06sp(specify other) and hrf07sp(specify other)

**HIVREP:** Removed rep02(staff id), rep06sp(Specify other), rep06psp(Specify other) and rep07sp(Specify other)

**HIVCC:** Removed icc01 (staff id), icc03asp, icc03bsp, icc04asp, icc04esp, icc05sp, icc06dsp, icc06esp and icc03e

**HIVCO:** Removed ico01(staff id), ico03sp(Specify reason), ico04asp(Specify plan), ico04fsp(Specify other contact), ico05sp(Specify reason), ico06bsp(Specify reason), ico07asp(Specify reason), ico07bsp(Specify plan) and ico08sp(Specify reason)

**HIVPOS:** Removed pos01(staff id), pos02sp(Specify other), pos03sp(Specify other), pos03rs(Specify other), tcpos05ac(Specify other), pos06sp(Specify other), pos07sp(Specify other) and pos08sp(Specify other)

**HIVEXP:** Removed exp01(staff id) and exp03sp(Other travel mode)

**HTVR:** Removed tvr01(staff id), tvr02sp(No med. rec. review specify), tvr03sp(Specify no HIV test), tvr04sp(Specify test type) and tvr05sp(Specify no HIV test)

**MRVPC:** Removed mrv01(Staff id)

**VIS:** Removed vis01(staff id), vis03sp(specify other), vis03rs(specify other) and vis07sp(specify other)

**WIC:** Removed wic01(staff id), wic02sp(CTP specify), wic02rs(specify other), wic03sp(specify other), wic03rs(specify other), wic04sp(specify other) and wic04rs(specify other)

---

## CTN-0032 CRF Level Data De-Identification Notes

---

**HIVRCO, HIVREPF and HIVRC:** These datasets are not included for de-identification as there was no data in these 3 datasets.

---

## CTN-0032 Database Descriptions

---

Databases for this protocol are available for download in both SAS and ASCII/comma separated value (CSV) format. When you retrieve the datasets from the data download page on the CTN Data Share website, a ZIP file will be provided containing the datasets.

Note that when you download the SAS datasets, the files will be SAS transport files. The transport.xpt contains all the SAS datasets available. The following code can be executed in SAS to retrieve the individual SAS databases.

```
libname newlib "[Name of Path where you want to store the SAS datasets. E.g.: c:\temp\CTN0032] ";
filename tranfile "[Name of path where you store transport.xpt. E.g.: C:\temp\ transport.xpt";
proc cimport library=newlib infile=tranfile; run;
```

Also in the SAS ZIP file are SAS transport files corresponding to each individual database. These files are provided to allow import into SPSS and differ slightly from the SAS datasets in the Transport.xpt and from the data dictionaries provided. We describe below specific modifications to the SAS datasets to accommodate SPSS import.

1. Renaming of SAS dataset to conform to 8 character limits:
  - a. WEEKLYFTP was renamed to WEEKLY34
2. Variables dropped because they are greater than 200 characters long
  - a. CTS\_REASON from AEMEDRA
  - b. ELG209\_COMMENT from ELG2
  - c. CTS\_REASON from SAEMEDRA
3. Renaming of variables to conform to naming of variables to be no longer than 8 characters.
